

Can I Eat That?

Toxic and non-toxic plants

It is important to know which plants are safe for horses to eat. Place the following plants and trees into the correct categories of toxic or non-toxic.

Red maple tree

Birdsfoot trefoil

St. John's wort

Buttercup

Hemlock

Beets

Canadian goldenrod

Orchard grass

Ash tree

Dandelion

Yew

Birch tree

Milkweed

Black walnut tree

Bracken fern

TOXIC	NON-TOXIC

Answers: Toxic – red maple tree, yew, St. John's wort, milkweed, black walnut tree, hemlock, bracken fern. Non-toxic – beets, birdsfoot trefoil, Canadian goldenrod, birch tree, orchard grass, ash tree, dandelion NOTE: Some non-toxic plants such as beets can be harmful if consumed in high quantities – always double check before feeding unknown
